TOP OVR

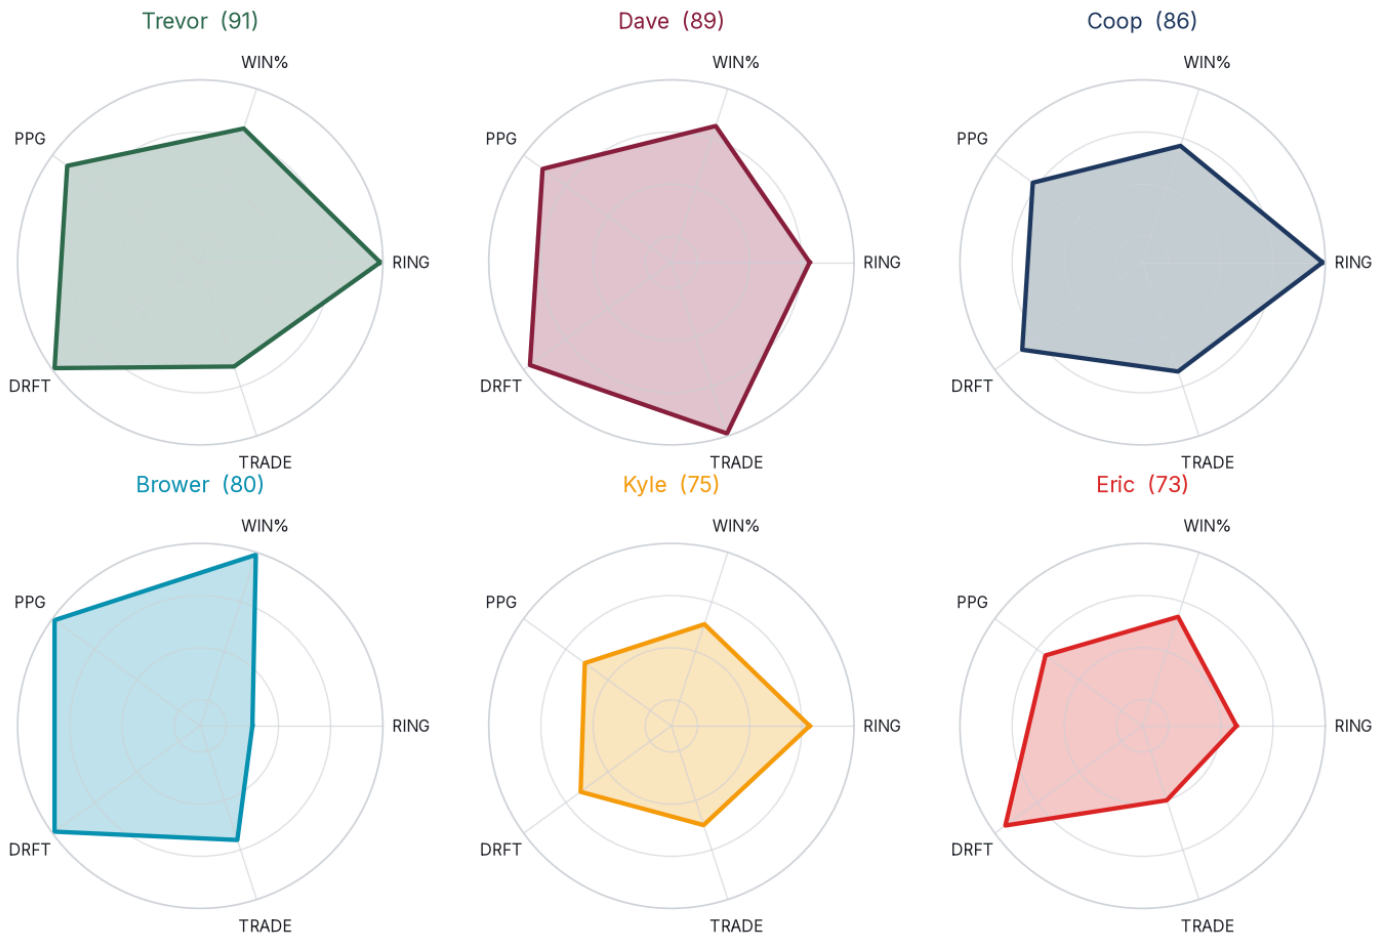

All-Time Power Rankings

OVR composite (longevity excluded — called out separately as tenure): **Rings 33%, Win% 22%, Draft 18%, Trade 14%, PPG 13%**. Each attribute normalized 0-99 within the pool. **FMR** = former manager.

Take: Dave (FMR) still tops the all-time ladder — he left the league at peak. Among current managers, **Trevor** is the lone Franchise-tier player.

All-Time Top 6 — Attribute Profiles

Take: Compare the polygon shapes — Dave's is the most balanced (high on every axis); Coop is win- and-rings-heavy but lighter on draft + trade.

Win% vs Scoring

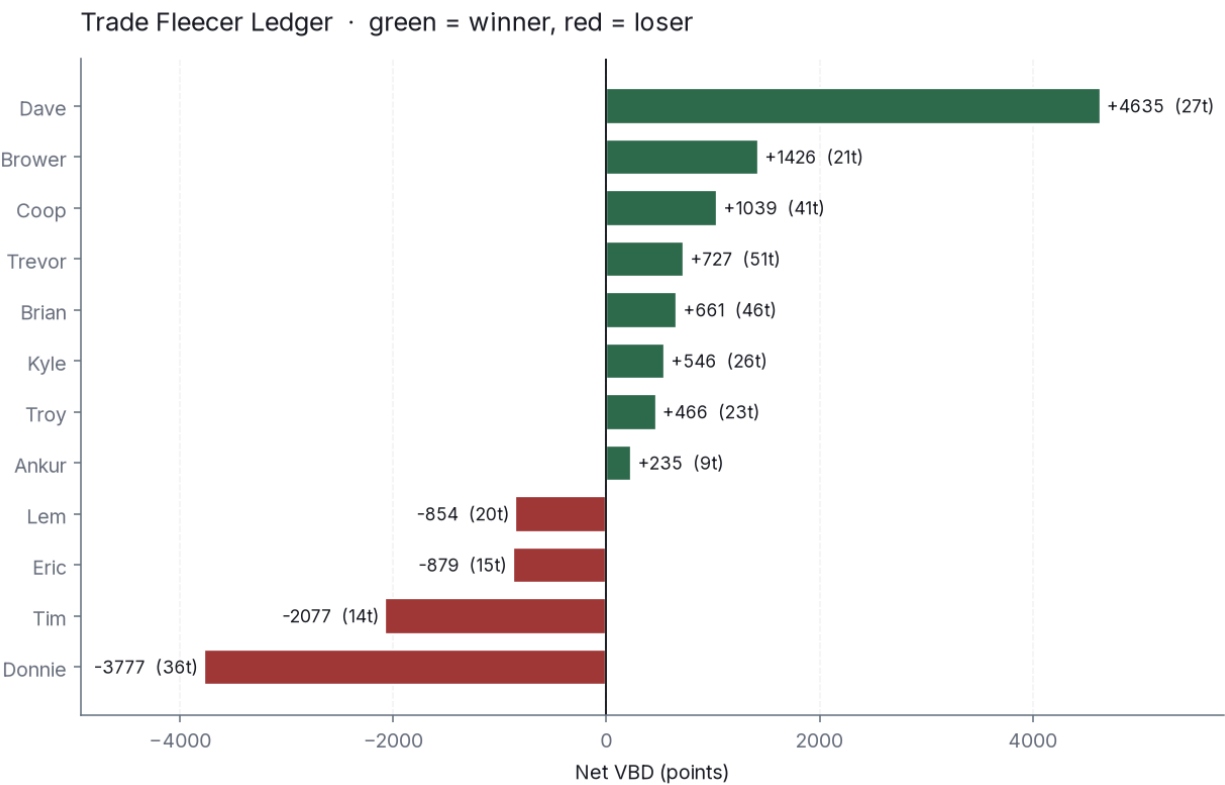

Where each manager lives on the win-rate / scoring plane. The top-right is the dream; the bottom-left is the basement. Bubble size = rings.

Take: **Brower** lives alone in the top-right — best win% AND PPG in the league, with a tiny 0-ring dot.
Donnie sits in the bottom-left with a 1-ring bubble: lucky ring on otherwise-bottom-tier production.

Trade Fleecer Ledger

Net VBD across every scored trade (Yahoo 2011-2022 + Sleeper 2023-2024), including picks (scored as the rookie-year production of the player actually drafted). Green = won, red = lost.

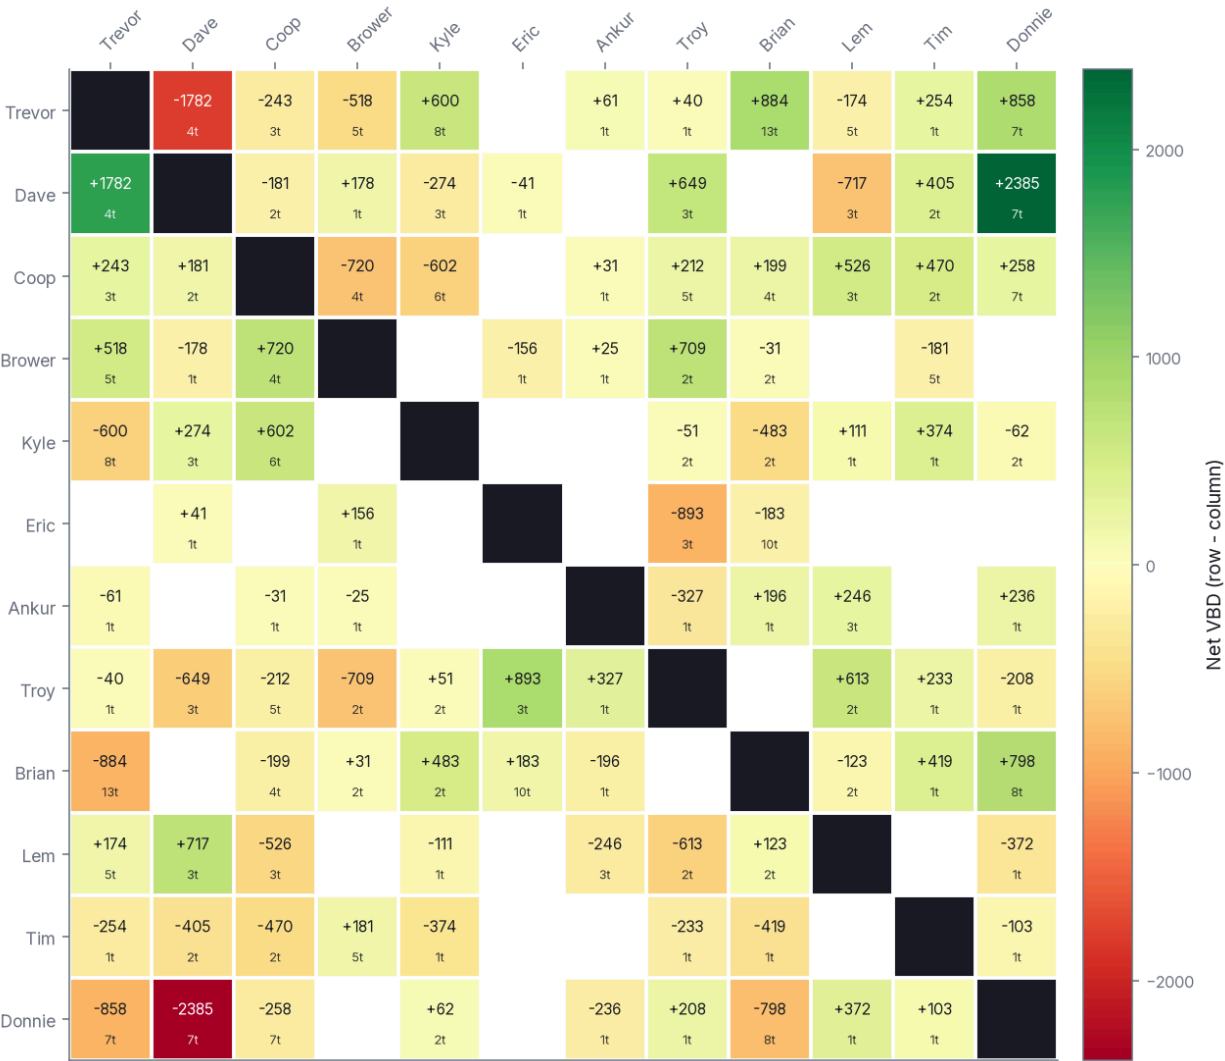

Take: Dave won the trade ledger by +4718, more than 3× the next closest. Donnie lost -3777, the worst pile of bad trades in league history.

Trade Fleecing Matrix

Every pairwise relationship in the league. Read across a row: *green cells* are managers this person fleeced, *red cells* are the ones who fleeced them. Number = net VBD; small subscript = trade count. Rows ordered by all-time OVR.

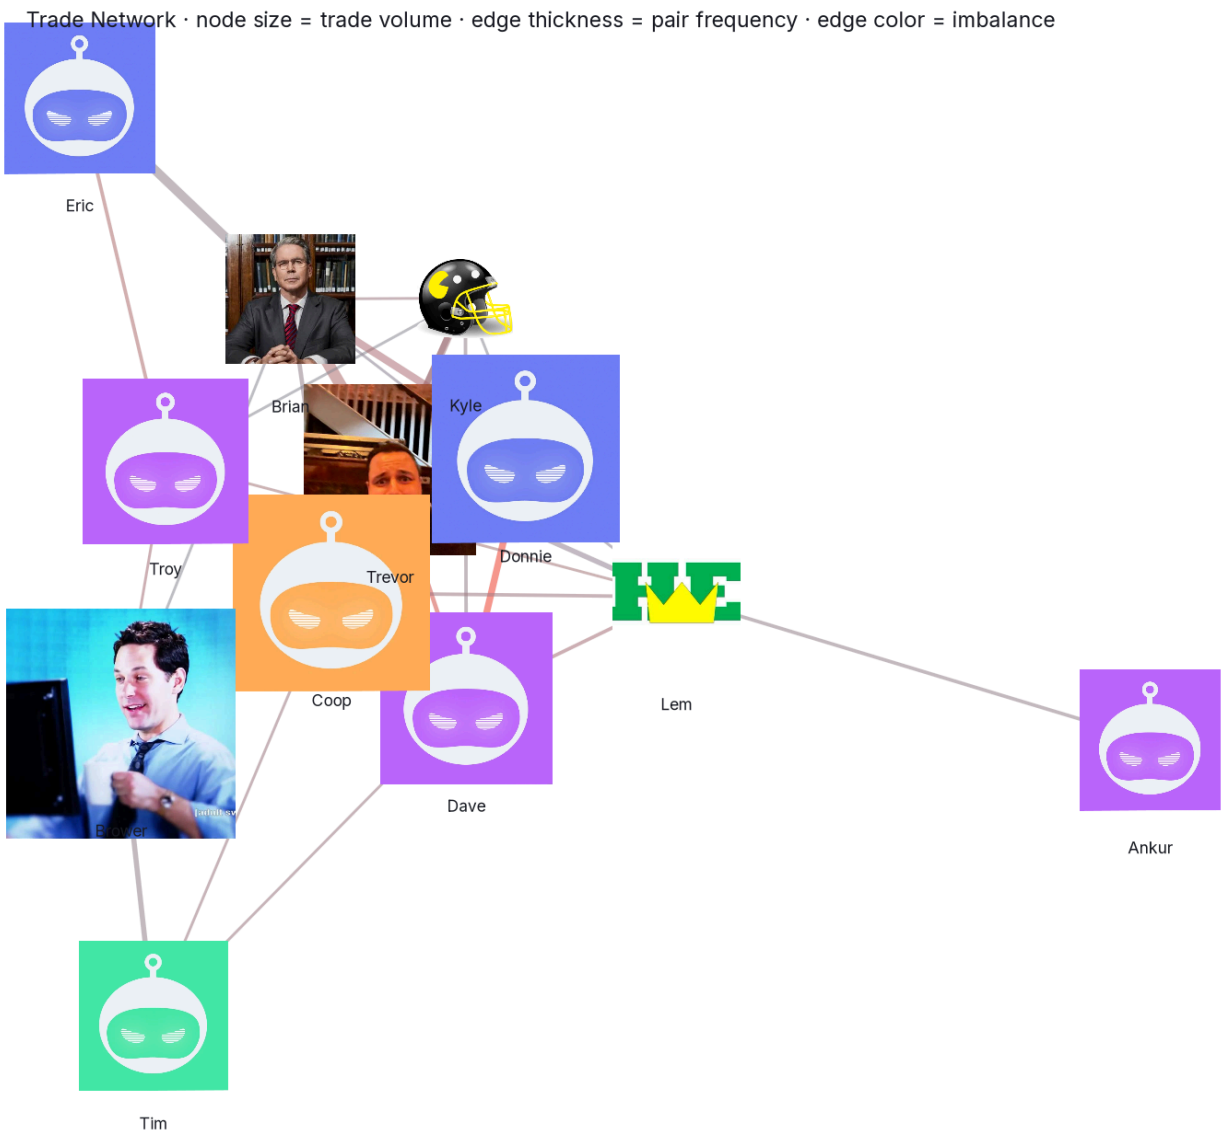

Trade Fleecing Matrix · ROW's net VBD vs COLUMN · green = row dominated, red = row got fleeced

Take: Look at Dave's row — almost universally green. Look at Donnie's row — almost universally red. The Brian-Eric cell is roughly neutral (~+180 Brian once picks are scored, which surprised everyone).

Trade Network

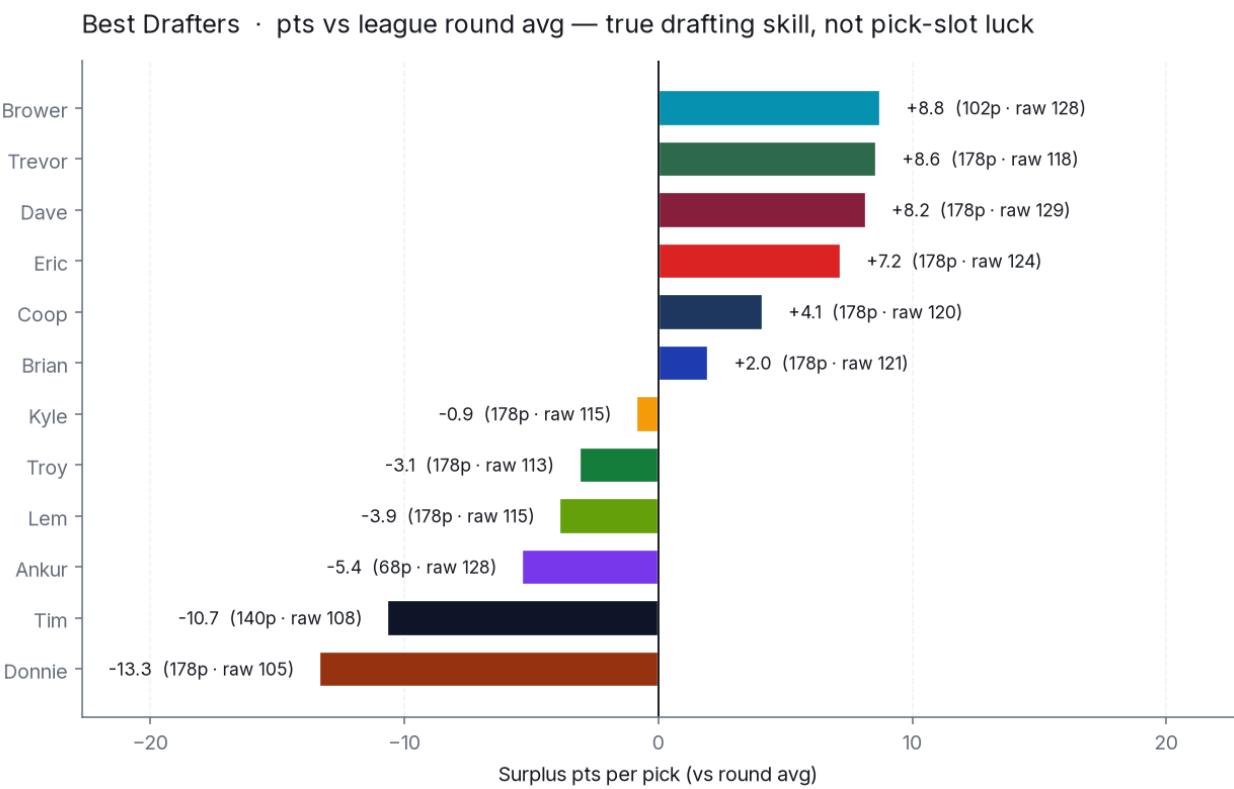

Force-directed graph of the league's trade economy. Bigger node = trades more; edges show pair frequency (thickness) and imbalance (color depth). Managers who only trade with a few others get pulled to the periphery.

Take: Trevor and Brian are central hubs (they trade with everyone). Tim and Ankur sit near the periphery — light traders who prefer the wire.

Best Drafters

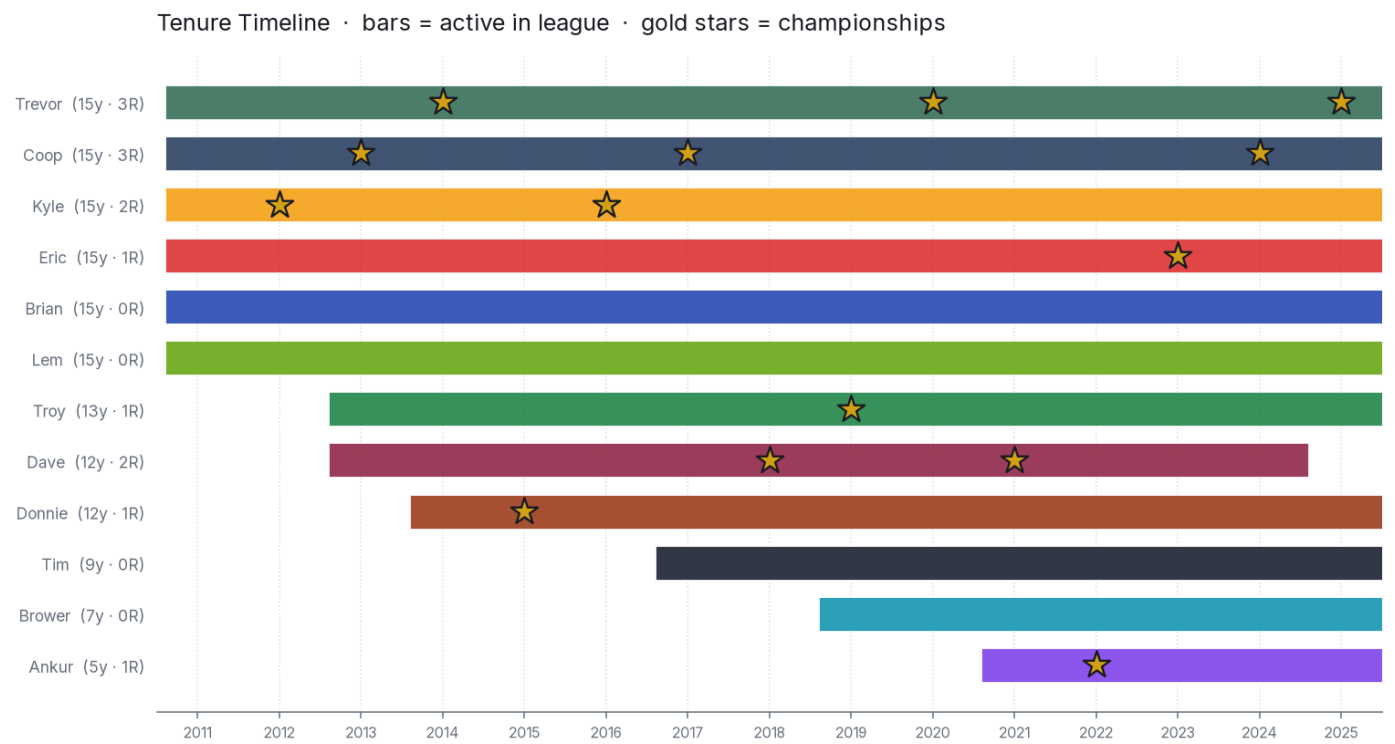

Draft skill measured as surplus rookie-year points vs the league average for the same round and year. Strips out the "high-pick advantage" — a drafter with a bunch of R1 picks isn't penalized for finding a normal R1 player. Positive = found above-replacement value. Min 20 career picks.

Take: Trevor's +9.0 surplus/pick is the league-best drafter — even though his raw pts/pick is mid-tier, he beats round expectation more than anyone. Ankur's raw was deceptively high; once normalized for slot, he's actually a bottom-3 drafter.

Tenure Timeline

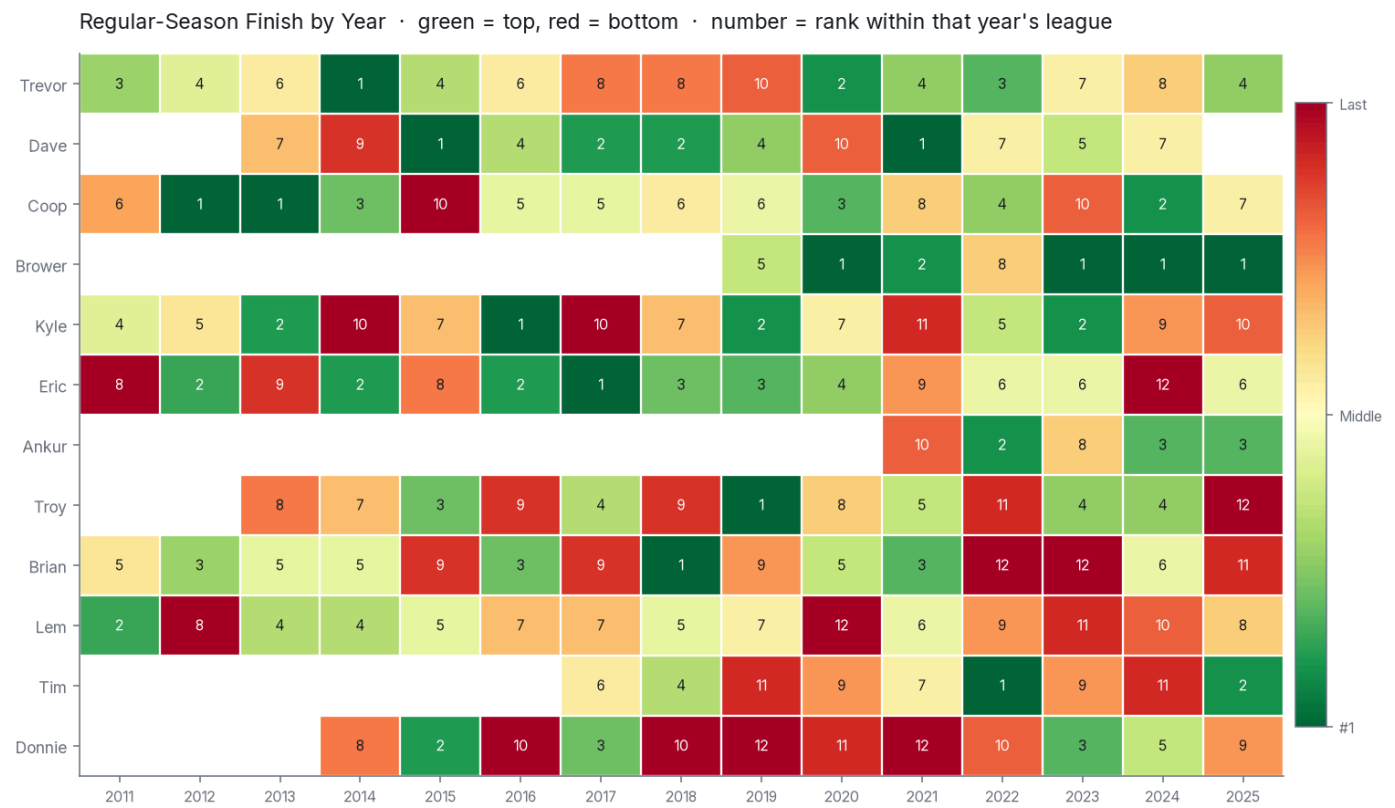

Who was in the league each year, with championships marked as gold stars. Shows how the league has evolved (8 → 10 → 12 teams) and who's been the most loyal.

Take: Six managers have played all 15 seasons (Trevor, Coop, Kyle, Eric, Brian, Lem). Only Trevor + Coop have 3 rings; Brian + Lem are the only iron-men with zero.

Regular-Season Finish, Year by Year

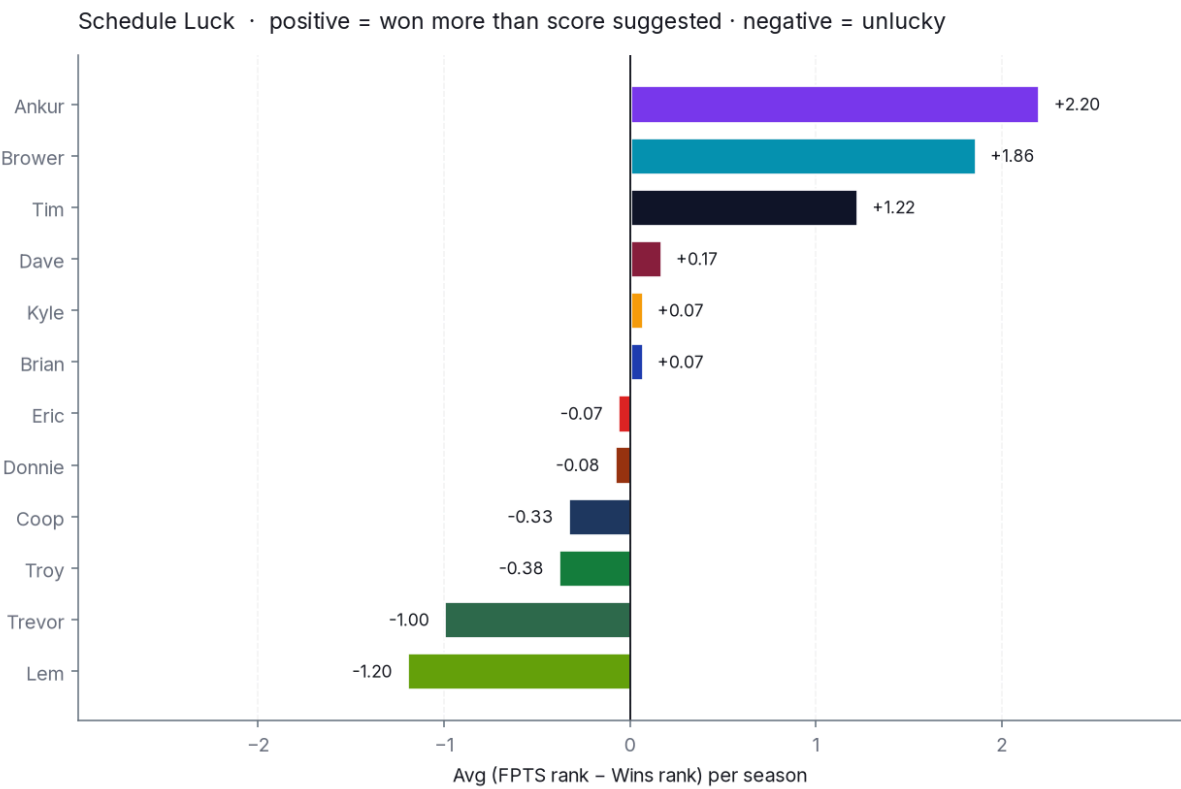

Each cell is where that manager finished in the regular-season standings that year (green = top, red = bottom). Reveals consistency, peak years, droughts.

Take: Kyle's row is the most volatile (#1 three times AND #10 four times). Brower's row since 2019 is an unbroken streak of top-3 regular seasons. Donnie's recent years are mostly red.

Schedule Luck

Average gap between FPTs rank and Wins rank across every season. **Positive** = won more games than their scoring deserved (lucky matchups). **Negative** = scored well but couldn't catch a break.

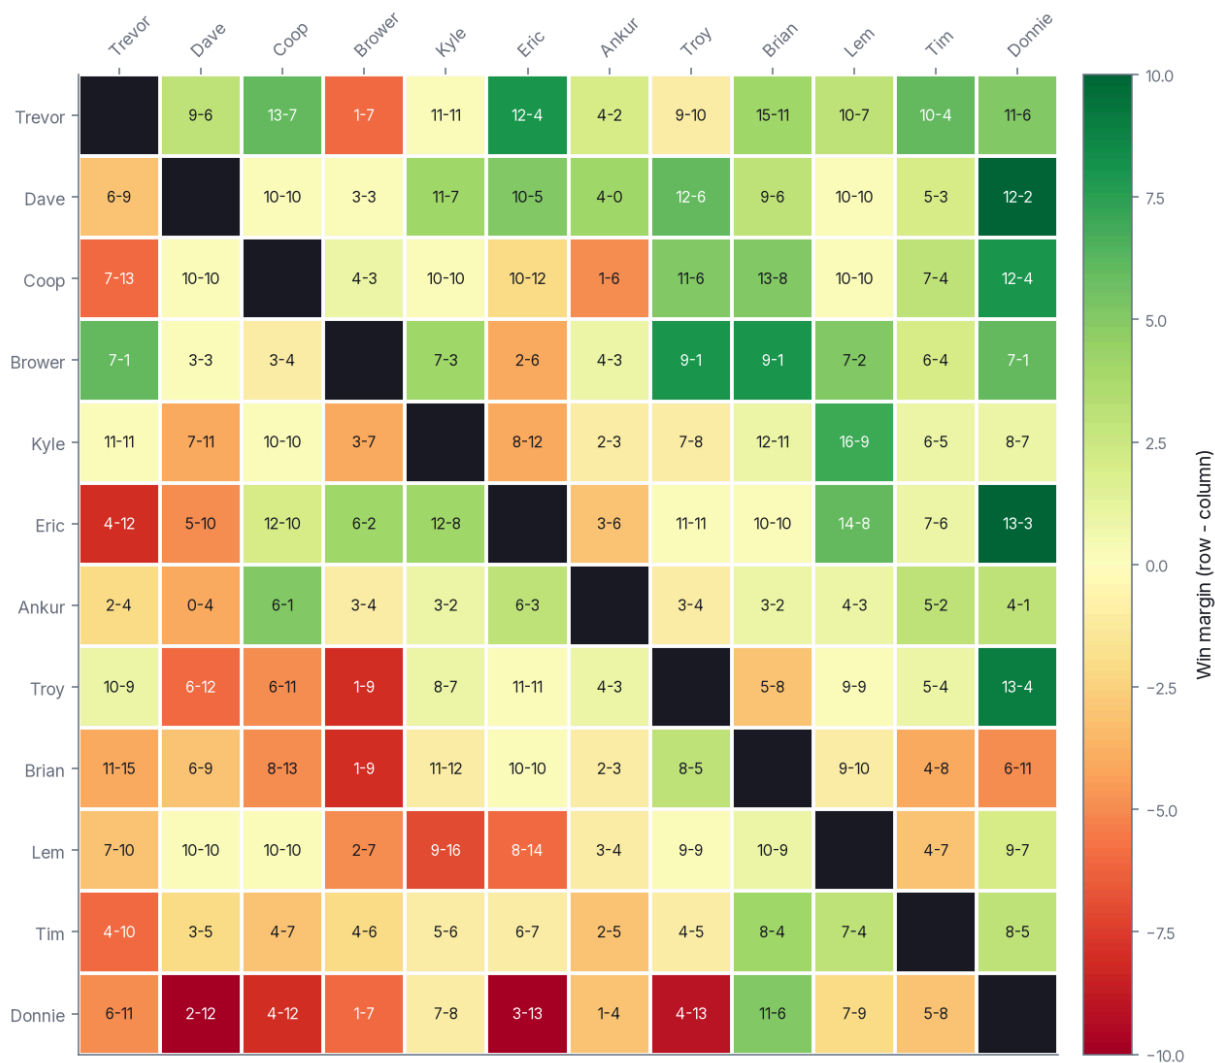

Take: Lem at -0.80 is brutally unlucky — scores enough to win but constantly matched against the week's high score. Brower + Ankur both at +1.00 — their records flatter their actual scoring.

Head-to-Head Career Matrix

Every pairwise regular-season matchup record. Cell = ROW manager's career W-L vs the COLUMN manager. Green = ROW dominant; red = ROW gets beat. Rows ordered by all-time OVR.

Head-to-Head Matrix · career regular-season record · ROW vs COLUMN · green = ROW dominant

Take: Dave's row is mostly green (he beat almost everyone he played). Coop owns Lem and Donnie. Donnie's row is mostly red.

Position Drafted by Round — Draft Strategy

Stacked position mix across each manager's entire drafting career (rounds 1-10). Reveals whether they reach for QBs early, hoard RBs, ignore TE, etc.

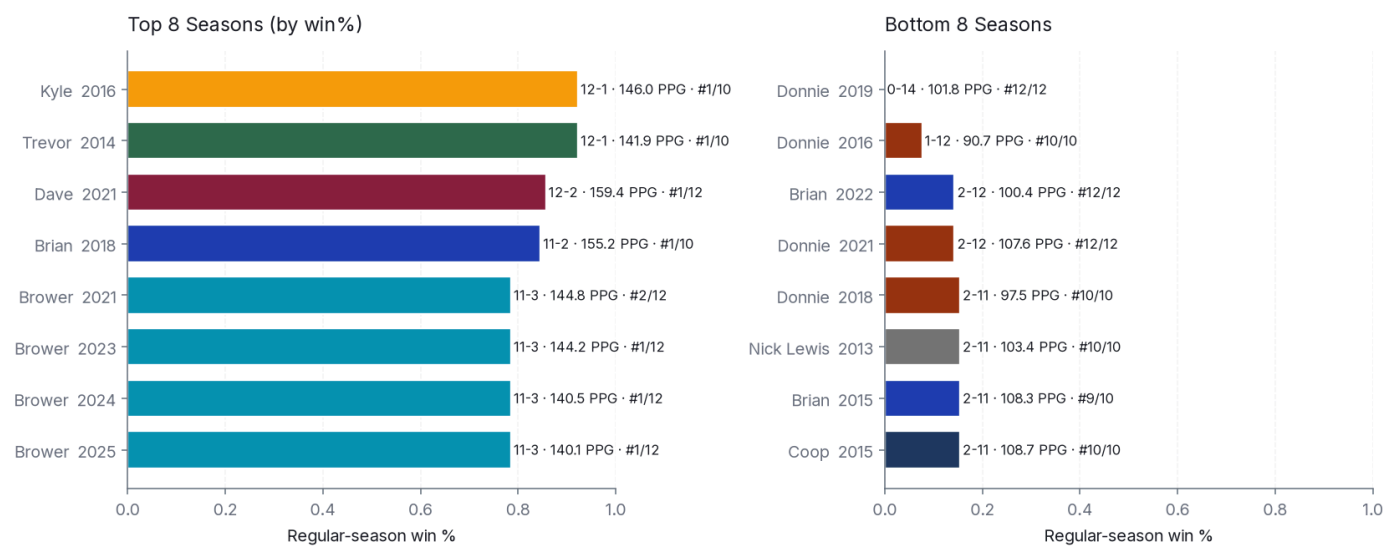

Positions Drafted by Round · rounds 1-10 · stacked counts across career

Take: Notice who hoards QBs early (red blocks in early rounds) vs who waits. Most managers go RB/WR heavy in rounds 1-4; the early-QB drafters stand out clearly.

Best & Worst Single Seasons of All Time

Top 8 and bottom 8 individual manager-seasons across 15 years of regular-season play (minimum 8 games).

Take: Brower's recent Sleeper-era seasons dominate the top-8 list — most rings-less elite stretch in league history. Brian + Lem each appear multiple times in the bottom-8.

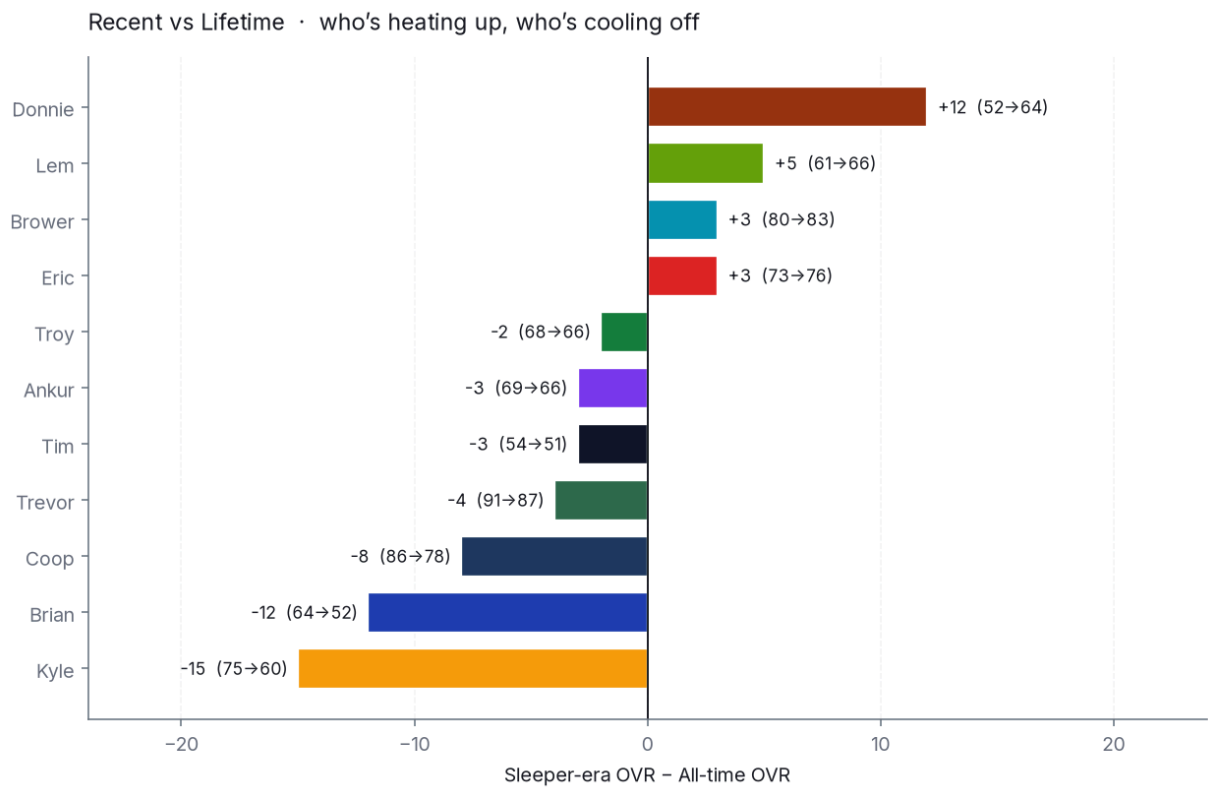

Favorite Players — Drafted Multiple Times

Players each manager has drafted in multiple seasons. The repeat targets reveal who manages by crush versus who casts a wide net.

Manager	Favorite players (× times drafted)
Trevor	Deshaun Watson ×3 · Justin Fields ×3 · A.J. Brown ×3 · Zach Ertz ×2
Dave	Nick Chubb ×4 · Tyreek Hill ×4 · C.J. Anderson ×4 · David Montgomery ×3
Coop	Calvin Ridley ×4 · Carson Wentz ×4 · Eagles ×3 · Rob Gronkowski ×3
Brower	Kirk Cousins ×4 · Robert Woods ×2 · Deebo Samuel ×2 · Michael Pittman Jr. ×2
Kyle	Aaron Jones Sr. ×4 · David Johnson ×4 · George Kittle ×3 · Josh Allen ×3
Eric	Michael Thomas ×4 · Baker Mayfield ×4 · Alvin Kamara ×4 · Ben Roethlisberger ×4
Ankur	Mike Evans ×3 · Tyler Higbee ×2 · Harrison Butker ×2 · Josh Allen ×2
Troy	Julian Edelman ×3 · LeSean McCoy ×3 · Dak Prescott ×3 · Antonio Gibson ×3
Brian	Mike Williams ×4 · Kirk Cousins ×3 · A.J. Green ×3 · DeAndre Hopkins ×3
Lem	Adam Thielen ×6 · Matt Ryan ×4 · Justin Tucker ×4 · JuJu Smith-Schuster ×3
Tim	Jaylen Waddle ×4 · Michael Gallup ×2 · Le'Veon Bell ×2 · Odell Beckham Jr. ×2
Donnie	Will Fuller V ×6 · Matthew Stafford ×4 · Todd Gurley ×3 · O.J. Howard ×3

Heating Up vs Cooling Off

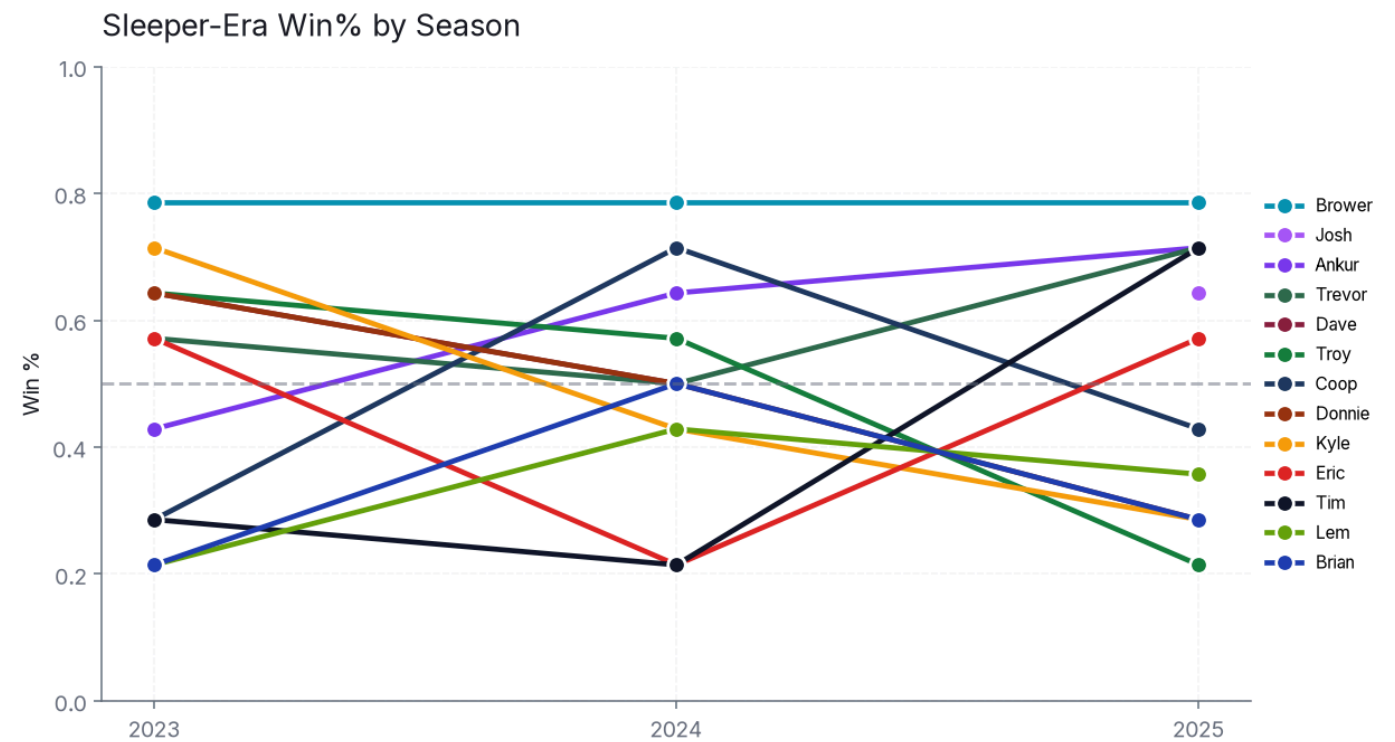

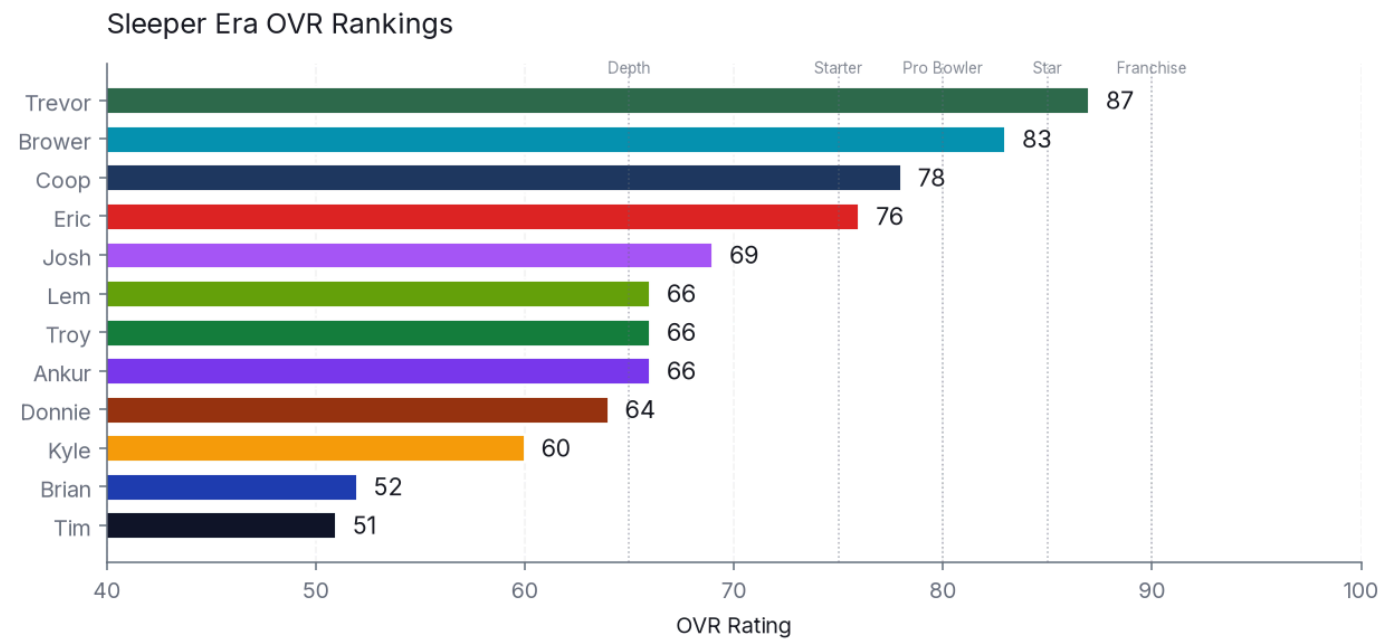

Sleeper-era OVR minus all-time OVR. Positive = they're playing better than their career average suggests. Negative = falling off.

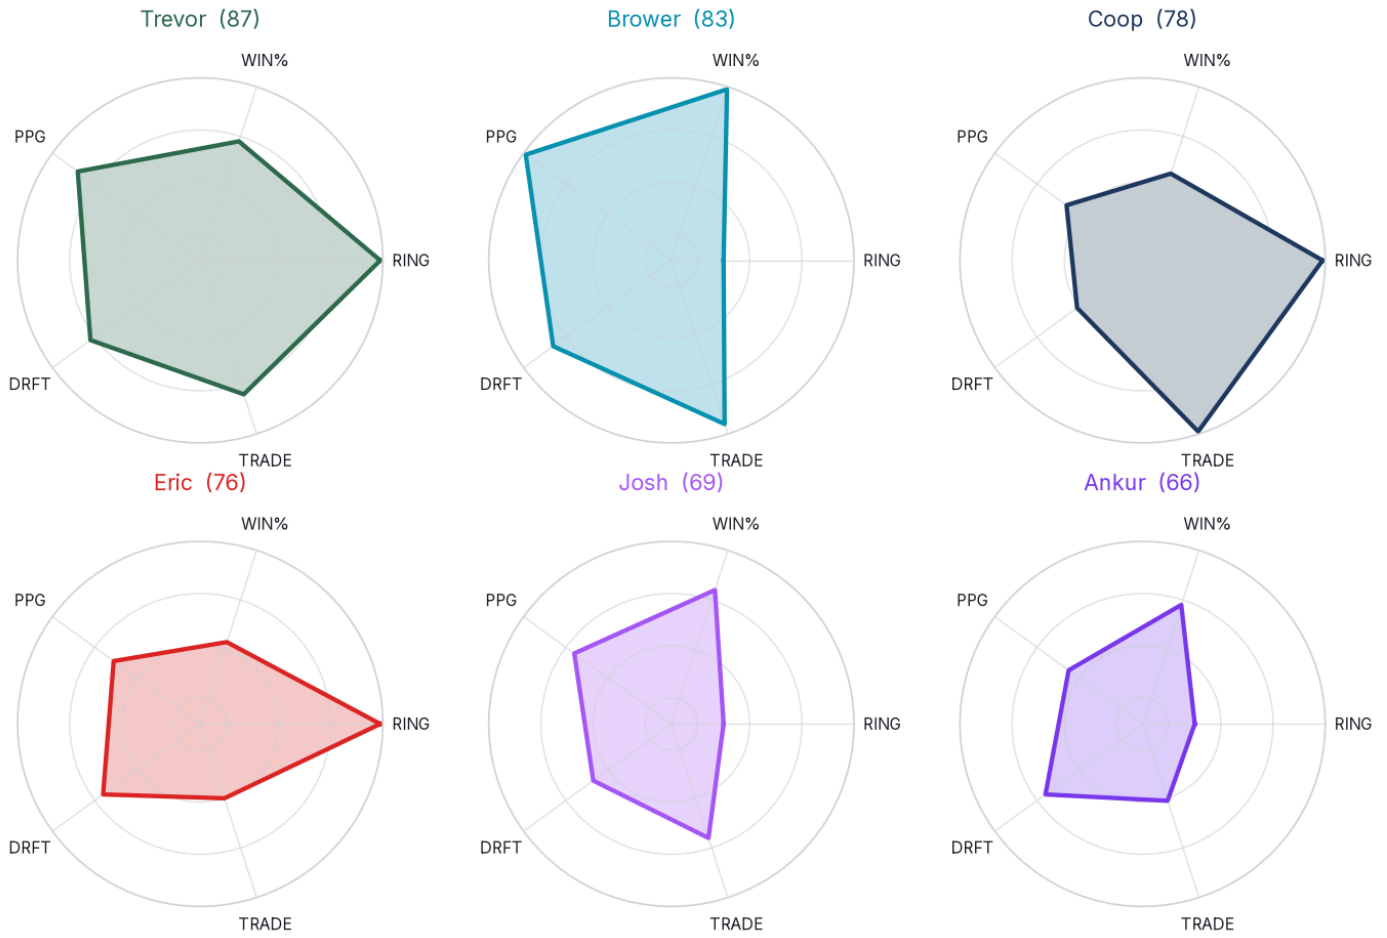

Take: **Brower** is heating up the most (Sleeper-era OVR well above his all-time). **Trevor** is the steadiest (small delta). Watch out for the cooling-off trend on the bottom.

League Personalities

One sentence per manager — what the numbers and lore say defines them.

THE VOLUME DRAFTER

Trevor

15 straight years, 3 rings, AND the league's most-frequent trader (52 trades). Despite never drafting from a high slot, his +9.0 surplus/pick is the best in the league — he wrings value out of every round. The closest thing to a perennial contender.

THE STEALTH CHAMPION

Coop

3 rings on a .537 win pct — wins championships without ever dominating the regular season. Famously didn't even attend the 2017 Club Risqué draft and still won the title. Iron-man 15-year vet who shows up when it matters.

THE CHOKER (SORRY)

Brower

League's best win pct (.701), best PPG (135.8), and #2 draft skill (+8.7 surplus). 0 rings. Every regular season is a coronation; every playoff is a heart attack. Most underrated active manager.

THE MANIC-DEPRESSIVE

Kyle

Two rings (2012, 2016) but the most volatile finishing record in the league — regularly oscillates between #1 and #10. When he's on, he wins it. When he's off, he's the basement.

THE SNEAKY DRAFTER

Eric

Below-average trade VBD (-879) but quietly #4 in draft skill (+7.2 surplus/pick). His 2023 ring came mostly from the draft — not midseason wheeling. The exact opposite profile of Donnie.

THE ROOKIE CHAMPION

Ankur

Won his ring in 2022, his FIRST season in the league. Has been respectable since but hasn't replicated it. The cautionary tale that a hot draft can carry you all the way.

THE HEIST SURVIVOR

Troy

13-year vet, 1 ring (2019), and the most schedule-unlucky player in recent years (-0.54 fpts-to-wins gap). Often scores his way out of the playoff race but can't translate to W's.

THE BEAUTIFUL LOSER

Brian

15 years, 46 trades, 0 rings. The most active manager who has never won. Went 11-0 in 2018's regular season then lost in the playoffs to finish 4th. Has played every snap of MONEYLEAGUE history without lifting the trophy.

THE COSMICALLY UNLUCKY

Lem

15 years, 0 rings, schedule luck -0.80 (worst in the league). Routinely scores enough to win but gets matched against the week's highest scorer. The universe owes him a ring.

THE QUIET ANCHOR

Tim

9 years, 0 rings, .452 win pct. Doesn't trade much (-2077 VBD), doesn't draft well (-10.7 surplus). Doesn't get fleeced either. The league's bedrock — always there, never the story.

THE LOTTERY WINNER

Donnie

1 ring + EVERYTHING ELSE is worst-or-near-worst: -3777 trade VBD (worst by 1700+), .362 win pct, -13.4 draft surplus. Living proof that fantasy football has a luck variance the size of Texas.

THE DEPARTED GOAT

Dave

By the numbers, the most complete manager in league history: +4718 trade VBD (#1 by a mile), .596 win pct, 2 rings in 12 years. Then he handed the roster to Josh after 2024. He left at the peak.

Methodology

Win/loss + PPG: regular-season games only (weeks 1-13 for 8/10-team years, 1-14 for 12-team years). Yahoo data via scraped matchups; Sleeper via league API. Rings: KNOWN_CHAMPIONS dict (Yahoo era) + winners_bracket.json (Sleeper era). Trade VBD: full-season nflverse fantasy points (0.5 PPR for 2019+, 0 PPR before) for players + rookie-year points of the player actually drafted at each traded pick (snake-order math against each year's actual draft data). Draft skill: total rookie-year points / total picks made. 2025 Sleeper trades excluded — no nflverse 2025 totals yet.
