The Rankings (with GUAP Takes)

#1

Trevor

Defending Champ, Depleted Cupboard

78.5
POWER

2025: **10-4** (#4)

PPG **154.0**

Momentum **↑ +21%**

2026 R1-R3: **1** (0/0/1)

Won 2025 but mortgaged his future doing it. 0 R1s and 0 R2s for 2026 — Kyle gutted him in the W6 deadline trade. Still the most consistent floor in the league, but the ceiling just got capped.

#2

Brower

Year of the Choke Breakthrough?

76.9
POWER

2025: **11-3** (#1)

PPG **140.1**

Momentum **→ +0%**

2026 R1-R3: **3** (1/1/1)

Three straight regular seasons winning the league. Three straight playoff exits. Still no rings. The data screams he should have 2 by now. Watch this card: either he finally gets one or we add 'Brower Curse' to the league lexicon.

#3

**Eric**
Sleeping Giant**62.1**
POWER2025: **8-6** (#6)PPG **131.4**Momentum **↑ +36%**2026 R1-R3: **3** (1/1/1)

2023 champ. Quiet 2024 + 2025 but he's a top-4 drafter when you control for slot. If he wakes up at the draft table, he's a playoff threat. Holds standard 1 R1/R2 capital.

#4

**Josh**
Year Two — Now It's His**52.6**
POWER2025: **9-5** (#5)PPG **130.5**Momentum **↑ +14%**2026 R1-R3: **2** (1/0/1)

Inherited Dave's roster and went 9-5 last year on training wheels. Now it's his draft, his trades, his decisions. The Dave-legacy asterisk comes off — for better or worse.

#5

**Ankur**
Came in Hot, Cooling Off**52.0**
POWER2025: **10-4** (#3)PPG **140.0**Momentum **↑ +7%**2026 R1-R3: **1** (0/0/1)

Won as a rookie in 2022 and we've been waiting for round 2. Traded away his R1+R2 in 2025 to chase, ended up middling. Now picking late with no top-end capital. Bridge year.

#6

**Coop**
Quiet Contender**49.6**
POWER2025: **6-8** (#7)PPG **119.7**Momentum **↓ -29%**2026 R1-R3: **4** (1/2/1)

Won 2024, slept through 2025 (.476). Now sitting on 1 R1, 2 R2s — enough capital to retool. History says he wakes up in odd years. Sneaky preseason pick.

#7

**Tim**
Sold the Farm Early**41.4**
POWER2025: **10-4** (#2)PPG **136.8**Momentum **↑ +50%**2026 R1-R3: **1** (0/1/0)

Already mortgaged his 2026 R1 in October trades. Long-snapper energy continues into year 10. Ceiling: 6th place. Floor: 12th.

#8

**Lem**
Schedule-Luck Tax**37.7**
POWER2025: **5-9** (#8)PPG **120.9**Momentum **↓ -7%**2026 R1-R3: **4** (1/2/1)

15 years, 0 rings, -0.80 schedule luck (worst in league). Sitting on 2 R2s and 2 R4s — actually decent capital. If the universe stops hating him, this could be his year.

#9

**Donnie**

The Lottery Ticket

36.5

POWER

2025: **4-10** (#9)PPG **129.0**Momentum ↓ **-21%**2026 R1-R3: **5** (2/1/2)

Bottom of every meaningful chart for years, but now sitting on 2 R1s after fleecing Tim. If you squint, there's a path. If you open your eyes, it's another double-digit-loss season.

#10

**Kyle**

The Pick Hoarder

29.7

POWER

2025: **4-10** (#10)PPG **110.7**Momentum ↓ **-14%**2026 R1-R3: **6** (3/2/1)

Three R1s. THREE. Bought Trevor's championship and shipped him every garbage pick he owned. If his ceiling years align with his rookie draft, this is a coronation. If they don't, it's another 10th-place finish.

#11

**Troy**

The Mid Mid Mid

22.6

POWER

2025: **3-11** (#12)PPG **113.0**Momentum ↓ **-36%**2026 R1-R3: **3** (1/1/1)

Hasn't finished higher than 4th since his 2019 ring. Hasn't finished below 8th either. Lives in the dead-zone of fantasy football. Could break either way.

#12

**Brian**

Year 16 Begins

11.8

POWER

2025: **4-10** (#11)PPG **106.7**Momentum ↓ **-21%**2026 R1-R3: **3** (1/1/1)

15 years in, 0 rings. The most-traded manager in league history still chasing his white whale. Going into 2026 with standard capital and the league's deepest scar tissue. The story writes itself if he ever wins one.
