

MONEYLEAGUE Funky Awards

The fun stuff · May 2026 · 3 seasons of Sleeper data (2023-2025)

Forget the percentile composites. These are the awards we'd actually hand out at a league dinner.

The Nuke — highest single-game score

Kyle detonated for **224.2 points** in 2023 Week 4. The league average that week was around 130. Felt good for about 6 days.

The No-Show — lowest single-game score

Josh managed just **63.1** in 2024 Week 5. Probably a bye-week massacre or an entire starting lineup benched. Either way: woof.

The Heartbreak — highest score that LOST

Eric dropped **179.4** points in 2023 Week 5 and still lost — Trevor put up 200.9. There is no justice in this league.

Houdini — lowest score that WON

Ankur scored just **79.8** in 2023 Week 1 and somehow took the W — Coop scored only 79.2. A truly awful game between two truly cooked rosters.

The Hammer — biggest blowout

Kyle 195.0 - 92.9 Josh in 2023 Week 13 — a **102.2-point** beatdown. Hope they at least sent a text apologizing.

The Photo Finish — closest game

Brower 118.12 - 118.06 Troy in 2024 Week 1 — decided by **0.06** points. Decimal places matter in this league.

The Heist — best draft pick of the era

Ankur took **Brandon Aubrey (K)** in **Round 13** of 2025 and got **+187 VBD** above what that round typically returns. That's a value pick of a lifetime.

The Curse — worst draft pick of the era

Tim spent **Round 1** of 2023 on **Nick Chubb (RB)** and got **-223 below expectation**. Hurts to look at. We've all been there. Mostly.

Late-Round Kicker Magic

Lem drafted **Cameron Dicker** in **Round 14** of 2025, returning **+169 VBD**. That's first-round-RB production from a pick everyone else used on a punter.

Wire Wizard — best free-agent pickup

Troy plucked **Rico Dowdle** off the wire in 2025 Week 5, who then produced **+176 points** in the games after the add. Easily the best wire add of the Sleeper era.

The Hot Potato — player who got passed around the most

Odell Beckham (WR) was added and dropped a combined **7 times** in 2023. Roster fodder of the year.

The Boomerang Award — keeps re-adding the same guys

Trevor has re-added a player they previously dropped **32 different times** across the Sleeper era. There's a hypothesis being tested here, and the hypothesis is: nobody else wants this guy either.

Hyper-Manager — most wire activity

Trevor made **173 adds** over 3 seasons. Reportedly has push notifications on for Sleeper, ESPN, NFL.com, RotoWire, and three different weather apps for Buffalo.

Couch Coach — least wire activity

Donnie made just **22 adds** total. Set-it-and-forget-it energy. Honestly respect the discipline.

The serious version with percentiles and full tables is still available — this one's just for the group chat.
