TRADE		52	-2077 (14t)

Win% vs Scoring

Where each manager lives on the win-rate / scoring plane. The top-right is the dream; the bottom-left is the basement. Bubble size = rings.

Win% vs PPG · Bubble size = championship count · Dot = 0 rings · Giant = 3 rings

Trade Fleecer Ledger

Net VBD across every scored trade (Yahoo 2011-2022 + Sleeper 2023-2024), including picks (scored as the rookie-year production of the player actually drafted). Green = won, red = lost.

Trade Fleecer Ledger · green = winner, red = loser

Trade Fleecing Matrix

Every pairwise relationship in the league. Read across a row: *green cells* are managers this person fleeced, *red cells* are the ones who fleeced them. Number = net VBD; small subscript = trade count. Rows ordered by all-time OVR.

Trade Fleecing Matrix · ROW's net VBD vs COLUMN · green = row dominated, red = row got fleeced

Trade Network

Force-directed graph of the league's trade economy. Bigger node = trades more; edges show pair frequency (thickness) and imbalance (color depth). Managers who only trade with a few others get pulled to the periphery.

Trade Network · node size = trade volume · edge thickness = pair frequency · edge color = imbalance

Best Drafters

Rookie-year nflverse points produced by every player each manager drafted, normalized per pick.
Minimum 20 career picks to qualify.

Best Drafters · pts produced per pick made

Tenure Timeline

Who was in the league each year, with championships marked as gold stars. Shows how the league has evolved (8 → 10 → 12 teams) and who's been the most loyal.

Tenure Timeline · bars = active in league · gold stars = championships

Regular-Season Finish, Year by Year

Each cell is where that manager finished in the regular-season standings that year (green = top, red = bottom). Reveals consistency, peak years, droughts.

Regular-Season Finish by Year · green = top, red = bottom · number = rank within that year's league

Schedule Luck

Average gap between FPTS rank and Wins rank across every season. **Positive** = won more games than their scoring deserved (lucky matchups). **Negative** = scored well but couldn't catch a break.

Championship Timeline

15 years of titles, one trophy per season. Rows ordered by total ring count.

Championship Timeline (2011-2025)

Sleeper Era (2023-2025)

The last 3 seasons only — recency view. Weights: Rings 26%, Win% 24%, Draft 23%, Trade 14%, PPG 13%. All 12 current rosters included regardless of tenure.

Methodology

Win/loss + PPG: regular-season games only (weeks 1-13 for 8/10-team years, 1-14 for 12-team years). Yahoo data via scraped matchups; Sleeper via league API. Rings: KNOWN_CHAMPIONS dict (Yahoo era) + winners_bracket.json (Sleeper era). Trade VBD: full-season nflverse fantasy points (0.5 PPR for 2019+, 0 PPR before) for players + rookie-year points of the player actually drafted at each traded pick (snake-order math against each year's actual draft data). Draft skill: total rookie-year points / total picks made. 2025 Sleeper trades excluded — no nflverse 2025 totals yet.
